EPICS CUSTOMER LIST9

EPICS Version 9.2 is Now Available

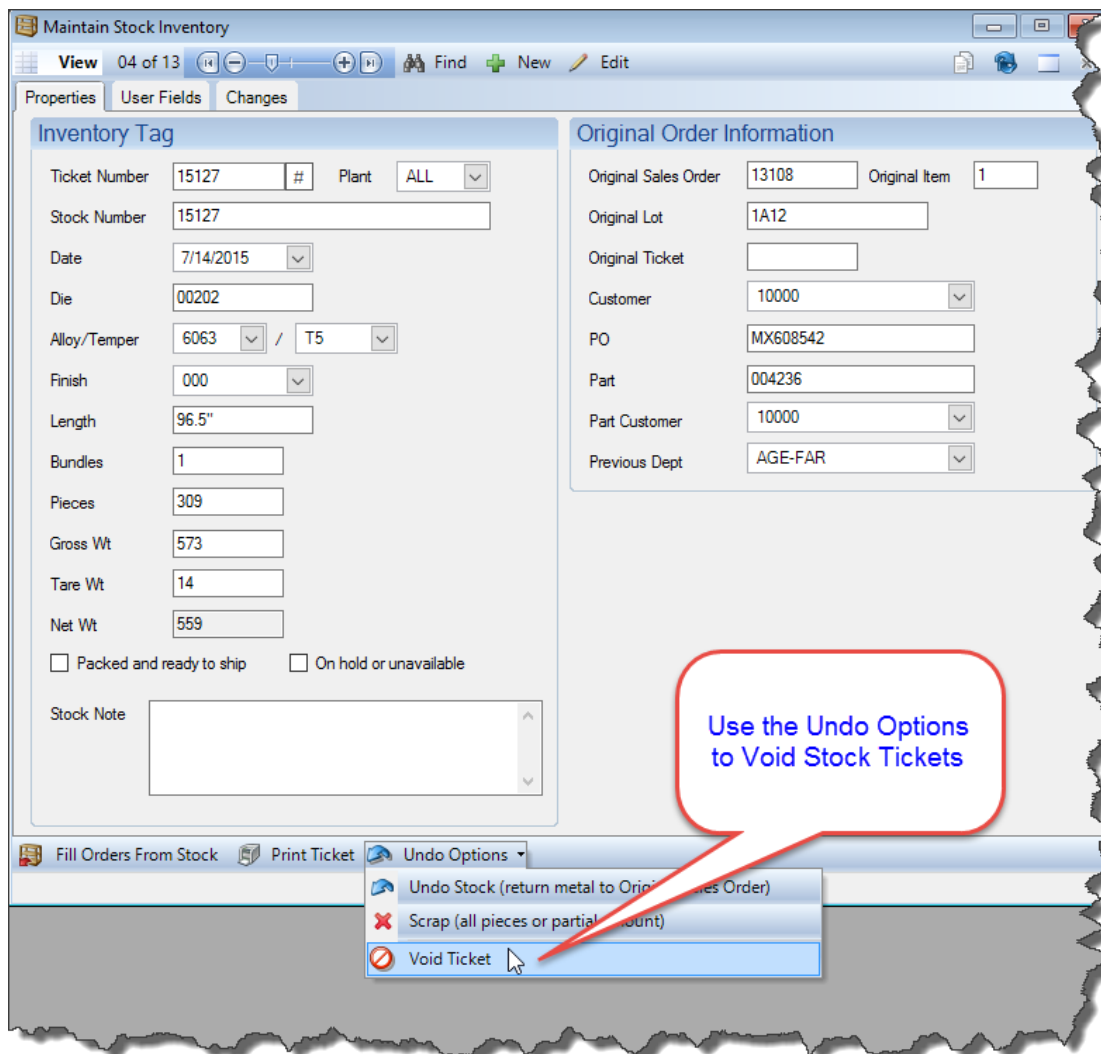

A new major update is now available for EPICS V9. This includes a number of important fixes and **8 new wishlist items**, 4 of which were in the top 10!

Please remember to use the [V9 Major Update Procedure](#) when performing this update.

Below is a detailed description of the major update:

* EPICS wishlist item

- *(#3) You now have the ability to Void a stock ticket rather than delete it from the Maintain Stock Inventory screen. This will set the status to 'X' and provides you with a history of stock management.

Once a Stock Ticket is voided, it receives a status 'X' and can be viewed from the Maintain Tickets screen.

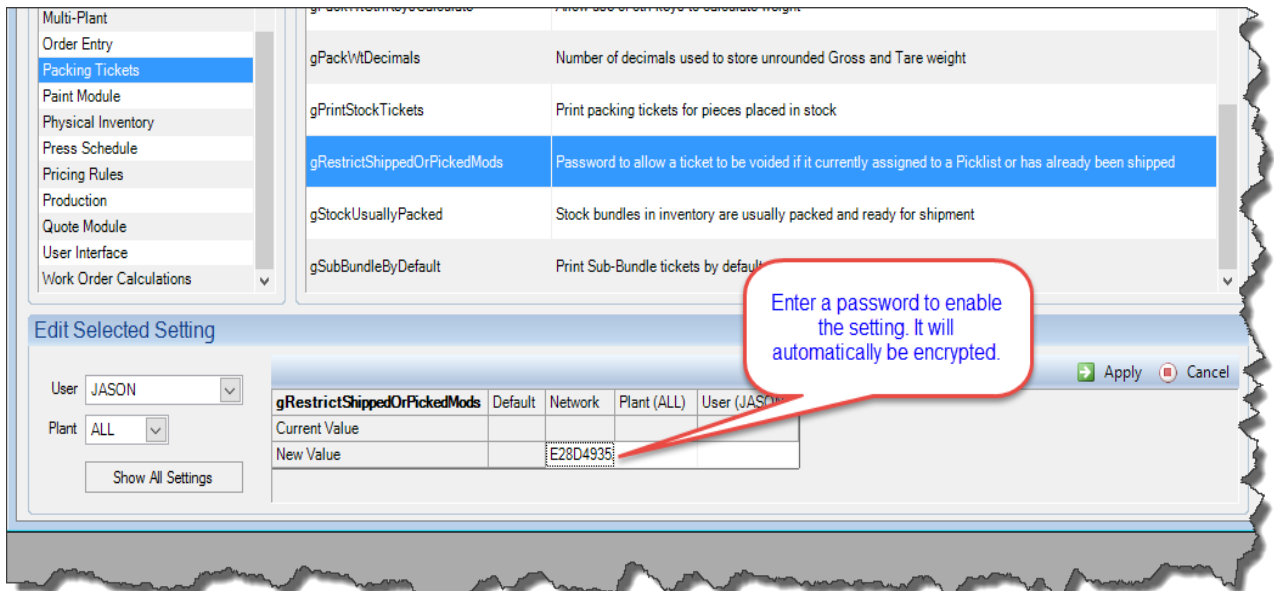

The screenshot shows the 'Packing Tickets' application window. The 'Ticket' section displays 'Ticket: 15127', 'Status: X', and 'Plant: ALL'. The 'Ticket Values' section shows 'Pieces: 309' and 'Bundles: 1'. There are also checkboxes for 'Hold (prevent shipping)' and 'Total Recycled'. The right side of the window has tabs for 'Master Control' and 'Packing'.

You will need to use the 'Delete Tickets' screen (Administrator>Manage Database>Delete Tickets) to permanently remove voided stock tickets.

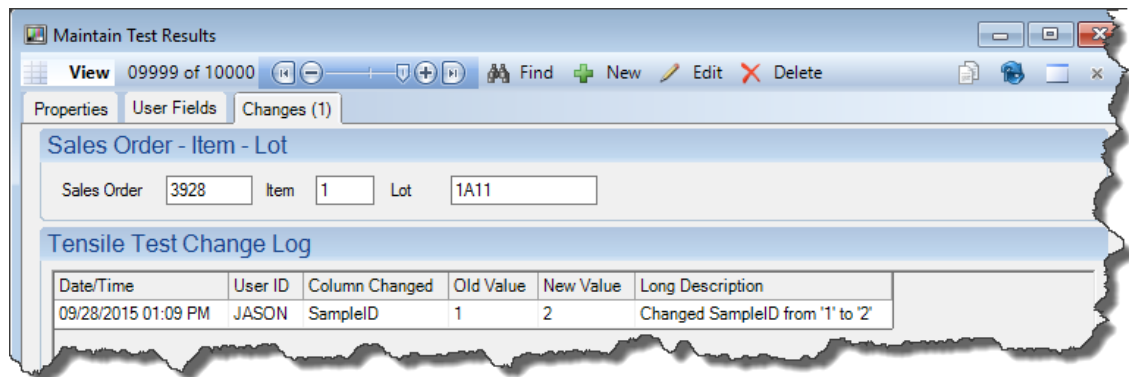

The screenshot shows the 'Delete Tickets' application window. It features an 'Important Information' section with a warning that deleted tickets cannot be recovered. Below this is a 'Status and Date Selection' section with a list of ticket statuses: Status P, Status R, Status S, Status V, and Status X. The 'Status X (Voided Stock Tickets)' option is checked. A red callout bubble with the text 'New Option' points to the 'Status X' checkbox. At the bottom, there is a 'Select an Activity Date...' section with a date field set to '7/31/2015'.

- *(#5) We have doubled the number of user fields for all tables that include them (increase from 65 to 130 user fields per table).

- *(#6) A new configuration setting can prevent users from voiding, scrapping, or un-shipping tickets that have been shipped to a customer or depot (Status 'S' and 'D') or placed on a picklist.

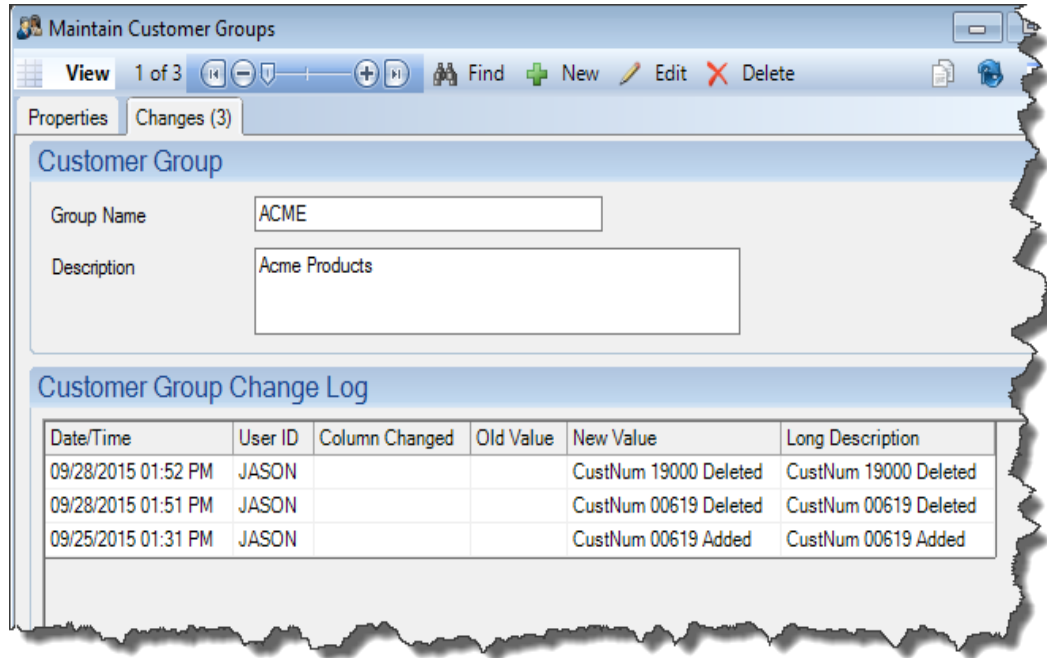

- *(#8) Tensile test records now have a change log.

- *(#12) The Invoice, Manifest, and ChemComp tables now have user fields (130 user fields each).
- *(#27) The Billet table now has user fields.
- *(#29) We enlarged the fields that store drawing file locations from 30 to 512 character maximum to allow for longer file paths.

- *(#30) The Customer Groups screen now has a change log.

- Fix: When scanning any ticket that is part of a master ticket on the Enhanced Shipping Module, all tickets that are part of that master ticket will also be scanned.
- Fix: If it is in the item's routing, update pack to outside departments correctly when packing multiple identical tickets on same date.
- Fix: Reports menu: Maintain window state and keep form in front when you click the "View Report Details" button.
- Fix: Correct problem with column locking and price locking on SOEntry and Quote screens.
- Fix: Improve calculation of PricePerWt for per/item charges on order entry and quote screens.
- Fix: Eliminate Crystal memory leak when printer selection is turned on.
- Fix: Do not increase remaining weight for PULLED department when shipping tickets that were pulled as ready-to-ship.
- Fix: Correct rounding of total billet weight on production screen when billet weight/length includes more than 3 decimal places.

Reserve Your EUC 2016 Room

Reserve your spot now! We are headed to the [Fort Lauderdale Marriott Pompano Beach Resort & Spa](#) in Pompano Beach, Florida.

You can reserve your room now! Make your [RESERVATION](#) soon as rooms will be limited and will probably go fast. If you prefer to call, *you can call (855) 954-4680 Monday-Friday between the hours of 9 AM – 5 PM EST.*

Use the phrase '**Foy EPICS User Conference**' when calling.

Rooms are held at the special conference rate of **\$219 per night** and are available **April 2nd – 7th**.

This is an absolutely beautiful resort right on Pompano Beach with excellent facilities. It's the perfect place to catch up with old friends, make new friends, and get all the important EPICS updates. So hurry and make your hotel [RESERVATION](#) now!

EPICS Web Apps Update

The **Order Status** app is currently in beta and we have several customers testing. So far the feedback has been positive and has helped us to make some important tweaks. You can see the original detailed description of this app in the [August Newsletter](#).

One of the key improvements already made to the Order Status app is adding the ability to drill-down for even more Order Item detail, as seen below.

Bauer Technology Order Status

12600	45656	1	03/27/2015	SHIPPED COMPLETE				

You also now have the choice between emailing or downloading a report directly from the web browser, as depicted in the following image.

Bauer Technology Order Status

Order Status **Reports**

		Report	Description
<input type="button" value="Email Report"/>	<input type="button" value="Save Report"/>	RECENT_ORDERS	Copy of all orders placed in last 90 days
<input checked="" type="button" value="Email Report"/>	<input type="button" value="Save Report"/>	STATUS	Order Status Report
<input type="button" value="Email Report"/>	<input type="button" value="Save Report"/>	RECENT_INVOICES	Copy of all invoices sent in last 90 days
<input type="button" value="Email Report"/>	<input type="button" value="Save Report"/>	RECENT_SHIPMENTS	Copy of all manifests sent in last 90 days

We would love to get your feedback on this app. If you would like to be a beta tester, please [contact us](#) and we will provide your login information right away.

For testing purposes, we will provide the sample data so that all you have to do is open a web browser and login with the user and password that we provide, and give it a try!

We are making progress on our development of an **Outside Processor App** (which you can also read about in [August's Newsletter](#)). The Outside Processor App is intended to help improve communication and visibility between the extruder and the vendor. Would you send a [quick email](#) and let us know what features would most likely benefit you in an application like this?

We are also in the beginning process of developing an **Order Entry App**.

The concept for the **Order Entry App** is to allow customers to login to an online order screen where they will be able to select from a dropdown of existing parts, with the ability to change the finish, length, alloy and temper if needed. This application is in the very early stages of development, so we would greatly appreciate [your thoughts](#) on what you would like an application like this to include.

We want to take full advantage of cloud computing capabilities, so look for more information regarding web applications coming from us soon. This will no doubt be a heavily discussed topic in the upcoming 2016 EPICS User Conference.

EPICS Training Opportunities

Take advantage of the opportunity to have your EPICS Administrator and key users trained thoroughly on EPICS V9. We are ready for you to [upgrade](#) and send a crew for training!

EPICS classroom training sessions are held at the Foy Inc offices in Farmersville, Texas. The next available V9 classes are scheduled for **October 19-22**, **November 16-19**, and **January 25-28**. The November class is filling up, so schedule soon! You can always view training class availability on our [Training Classes](#) webpage.

EPICS Customer List

*On any given day
EPICS is helping over 15,000 people
at around 100 extrusion plants around the world.*

Aacoa Extrusions – Niles, Michigan
 Aerolite Extrusion – Youngstown, Ohio
