EPICS User Conference 2026

Foy Inc was busy earlier this month hosting EPICS User Conference 2026 in Austin, Texas.

We had 71 attendees at EUC 2026, representing 35 plants. Among these attendees were guests that assisted in two special sessions. Chris Greaney was in attendance to talk about EPICS APIs and how his consulting company has aided several EPICS customers in optimizing their API usage. Jake James was also in attendance to sit on our AI panel, which discussed how AI can assist extrusion plants with their data analysis and more.

As always, EUC 2026 had two wishlist sessions. Each plant had the opportunity to share with us how EPICS can better serve them. The ideas were collected into a list that will soon head your way for a vote. Please keep an eye on your email the last week of April for the chance to vote on which wishlist items we should prioritize. Each plant should only submit one ballot. Please confer with your team before submitting your ranking.

Thank you to all attendees of EUC 2026! Your feedback on this year's conference is invaluable and will help us make next year even better. Speaking of next year, the location for EPICS User Conference 2027 is announced on the following page. We hope to see you there April 18-21, 2027 and then at ET '27 April 26-30, 2027!

EPICS Customer List

On any given day EPICS is helping more than 15,000 people at over 100 extrusion plants on more than 250 presses in 14 countries around the world.

EPICS development is user-driven and continually enhanced by the ideas of its experienced and innovative users. [See the list of EPICS customers here.](#)

Online and In-person EPICS and Report Writing Training

EPICS User Training is available in-person at our training facility in Farmersville, Texas as well as online. In this four-day class, trainees work through the entire EPICS interface. The next in-person classes will meet June 22-25 and October 19-22. The next online classes are scheduled for May 18-21 and July 20-23.

For online classes, a good internet connection and dual monitors are essential. One monitor is needed for watching the instructor's screen and another for running EPICS. Trainees will connect via VPN to a training database on a Foy Inc server.

This is a great opportunity to provide training for your administrators and key users. Training is valuable not only for new users, but also as a refresher for long-time EPICS users. Take this opportunity to see the full scope of what EPICS has to offer.

As a reminder, a new benefit has been added to the Software Service Policy (SSP). Now included with EPICS Enterprise edition (16 or more user licenses) is EPICS user training for one person from your company annually. Class size is limited for paid and free trainees, so we recommend registering early for the training classes.

Report Writing training is also available. This is a two-day novice level class for learning Crystal Reports with emphasis on the use of the EPICS database. Please see the [Foy Inc website](#) for details.

If you are interested in any training opportunities, please call us at 972-782-7282 or email us at info@foyinc.com.
